

OPTiFOG™

Shore

FOG FREE

STOP THE FOG BEFORE IT STARTS

Staying safe includes uncompromised vision.

At NASSAU OOGP, we take the health and safety of you and your patients very seriously and we are working to provide you access to resources to help you get through this challenging time. One of the common issues associated with wearing face-masks for protection with glasses is the fogged lenses and impeded vision that come with it.

Stop the fog with **Optifog®** or **Shore Fog Free** lenses and add powerful anti-fog protection to your everyday lenses. Precision and safety are critical while wearing face protection and only Optifog® and Shore Fog Free lenses have special top layers that repel fog before it disrupts your vision. Enhance your lenses with breakthrough technology for the best and most durable protection against fog.
