

What is BluTech®?

Only BluTech® Lenses are made with a precise ratio of Ocular Lens Pigment and melanin, to block all UV and filter damaging blue light as Nature intended, all without altering color perception. Countless patients wearing BluTech have reported “drastic sleep improvement,” “more relaxed vision,” and peace of mind because they are taking a major step to preserve their long-term sight.

BLUE LIGHT

Blue light is the highest energy of all visible light and damages the retina. It can cause glare, poor vision, eye fatigue, sleep disruption and AMD (Age-Related Macular Degeneration).

BLUTECH LENSES

- Filter out harmful blue light
- 100% UV Protected
- Impact Resistant
- Super-Hydrophobic Anti-reflective Coating
