

Shore Photochromic Lenses are a value photochromic lens that utilize the most advanced technology that performs at the highest standards.

Shore Photochromic Lenses provide convenience for an active urban lifestyle of switching between indoors and outdoors. Balancing aesthetics with function, while providing 100% UVA and UVB protection.

Shore Photochromic Lenses are perfect for the wearer seeking clear lenses indoors and comfort outdoors. The lenses are clear indoors, while providing a filter to guard against irritation due to florescent and LED lighting. When outdoors, the lenses have greater activation to indirect light and perform at a higher standard in elevated temperatures.
