Poly Finished Single Vision with Synergy AR Coating

We're Growing With You

According to the Vision Council of America, 8.6% of vision care sales are for contact lenses. Although this may seem to be a minor piece of the total picture, can you afford to lose 1 out of 10 patients because you can't provide them with lenses faster than the chain retailer down the street?

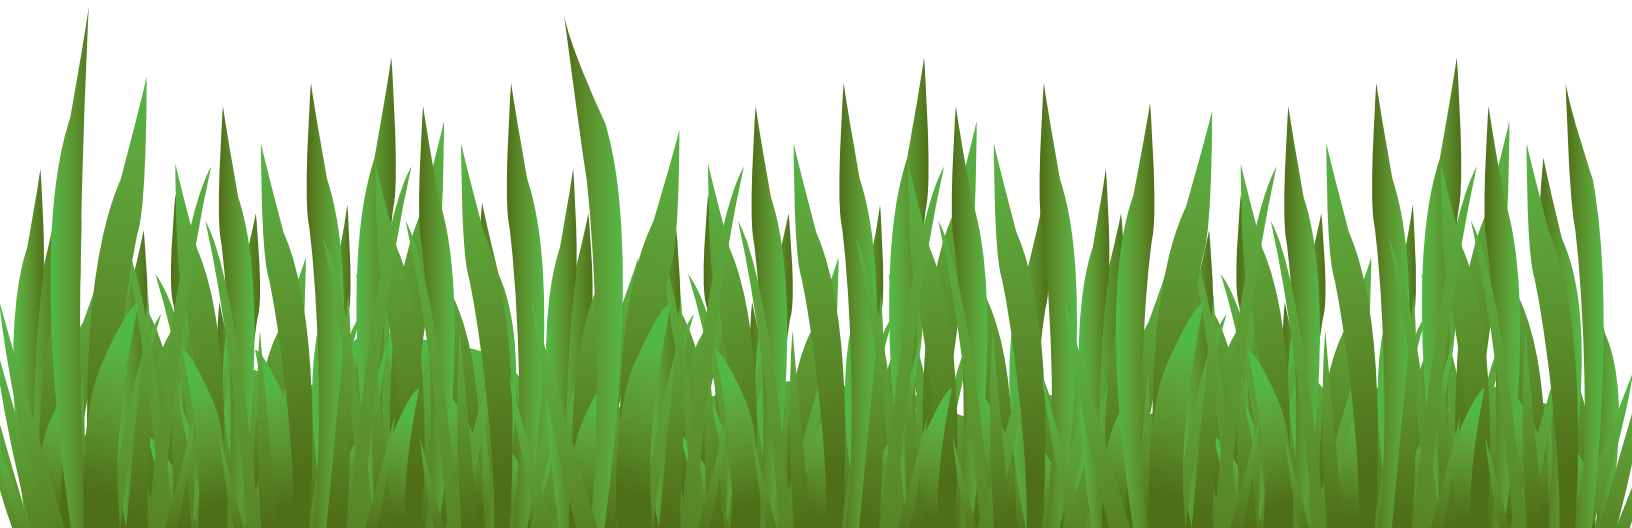

With this in mind, Nassau has expanded the total amount of contact lens SKUs on the shelf to 100,000 at their Main Distribution Center in New Jersey. With this depth and breadth of inventory, Nassau is capable of providing you complete fulfillment of your contact lens order 98.2% of the time, with next business day service.

In addition to better turn-around on contacts, you can expect to save money when you purchase from Nassau. Combining your existing stock lens orders with your contact order saves you freight charges that you would incur by using multiple vendors/multiple shipments.

Nassau has more of what you need; in stock, arriving next day, with lower shipping charges. Nassau Vision is growing with your practice.

100,000 Contact Lens SKUs Ready for Next Day Service

- **100,000 Contact Lens SKUs.**
